Digital Futures

Preparing Every Child for Tomorrow

2026–2029

Innovating today, educating for tomorrow.

Our Vision

Every Child. Every Opportunity. **Every Future.**

At Innovate2Educate Partnership, we believe every child deserves an education that prepares them not only for today's world, but for tomorrow's opportunities.

The world our children are growing up in is changing at an unprecedented pace. Technology, Artificial Intelligence and innovation are transforming how people live, learn and work. Many of the careers our children will enter have not yet been imagined, and the skills they will need will continue to evolve throughout their lives.

While the world changes, our purpose remains constant. To provide every child with an outstanding education that develops knowledge, confidence, character and a lifelong love of learning.

Digital Futures is our commitment to preparing children for that future.

- It is not about devices.
- It is not about increasing screen time.
- It is about ensuring that every child can flourish in an increasingly digital world while preserving everything that makes childhood, great teaching and exceptional schools so important.
- Everything begins with every child.
- Everything else follows.

Why **Digital Futures?**

Every Child

Our Schools

Education

The World

Everything we do begins with one simple question.

Will this improve the life chances of our children?

That question shapes every decision we make.

- It shapes the curriculum we design.
- It shapes the opportunities we create.
- It shapes how we invest in our people.
- It shapes how we embrace innovation.

Technology is Never Our Starting Point. **Children Are.**

Digital Futures exists because we believe every child deserves access to exceptional teaching, ambitious learning and the opportunities they need to thrive in a rapidly changing world.

We are committed to developing young people who are:

- Curious enough to ask questions.
- Confident enough to share ideas.
- Creative enough to solve problems.
- Independent enough to take ownership of their learning.
- Resilient enough to overcome challenge.
- Respectful enough to value others.
- Responsible enough to use technology safely and ethically.

These qualities will prepare our pupils not only for school, but for life.

What We Believe.

- Learning always comes first.
- Great teaching is irreplaceable.
- Technology should enhance learning, not dominate it.
- Innovation should remove barriers and create opportunity.
- Every child deserves equitable access to high-quality learning.
- Childhood should be protected, celebrated and enriched.

Technology is not the goal. Better learning is.

The Digital Futures **Framework**

Safeguarding | **Responsible AI** | **Wellbeing** | **Digital Citizenship**

Our Trust Vision

Innovating Today. Educating for Tomorrow.

Characteristics of Learning

Curious • Confident • Independent • Resilient • Creative
Critical Thinkers • Problem Solvers • Communicators
Collaborative • Respectful

Digital Futures Enriches Learning

Removes Barriers • Personalises Learning
Provides Immediate Feedback • Develops Independence
Enables Creativity • Increases Opportunity
Prepares for Tomorrow

Impact for Pupils

Better Learning • Greater Confidence • Improved Outcomes
Future Ready • Equal Opportunity

Digital Futures is the way we bring our Trust vision to life in classrooms every day.

In Our Classrooms, **Children Continue To...**

Stay Active

Use Technology
when it genuinely improves learning

Professional teachers choose the right tool for the right lesson at the right time. Technology is one of many resources available to them.

It never replaces great teaching. It strengthens it.

Our **Commitment**

Digital Futures is a long-term commitment to ensuring every child is prepared for tomorrow.

Over the next three years, we will continue to strengthen teaching, develop our people and invest in innovation that improves learning and expands opportunity.

We will...

Develop Future-Ready Learners

Supporting every child to become curious, creative, confident, independent and resilient.

Empower Our Staff

Providing high-quality professional development that helps staff use digital technology confidently, purposefully and effectively.

Remove Barriers

Using technology to improve accessibility, inclusion and personalised learning so every child can achieve their potential.

Keep Children Safe

Embedding safeguarding, digital citizenship and responsible use of Artificial Intelligence across our curriculum and culture.

Measure What Matters

Success will never be measured by the number of devices in our schools.

Success will be measured by the difference we make to children's lives.

Children who:

- achieve highly;
- think critically;
- communicate confidently;
- act responsibly;
- embrace challenge;
- are prepared for the future.

Our Promise

Every decision we make begins with one simple question.

Will this improve the life chances of our children?

If the answer is yes, it belongs within Digital Futures.

Because every child deserves the opportunity to flourish in an ever-changing world.

Every **Child.**
Every **Opportunity.**
Every **Future.**
